3 Highlights

Plot twist

The aim of the paper is to update the research focus of Crespo Cuaresma et al. (2014) [1] and expand it by including regions of EU candidates, too.

- | | |
|--------------------------|-----------|
| ① Republic of Serbia | ⑥ Albania |
| ② Bosnia and Herzegovina | ⑦ Turkey |
| ③ Montenegro | ⑧ Georgia |
| ④ Kosovo | ⑨ Ukraine |
| ⑤ North Macedonia | ⑩ Moldova |

[Go to Figure](#)

Overall, the dataset counts 36 candidate regions and 282 EU regions across 36 countries.

Area of Research

Macro-regions of Europe

Back

Some NUTS-2 changed contour across time, impacting data coverage.
Such cases are:

- Group 1: Croatia, England, Hungary, Lithuania.
- Group 2: Ireland, Scotland.

[Go to Figure](#)

For Group 1 regions I will use the consolidated form (offering better coverage) whereas for Group 2 regions, the most recent subdivision (and impute the *NAs*).

Example

Group 1

Lithuania Before 2013

Lithuania After

Group 2

Ireland Before 2013

Ireland After

Sources:

- EU Databases: ARDECO, Eurostat, ESPONS;
- World Bank;
- National Statistical Offices;
- WiiW;

Time span: 2009 - 2019.

Regressors: 30 core variables + 7 controls.

Missing observations: $< 1\%$ of the entire dataset (core).

Dependent variable: GDP Growth (constant prices)

Explanatory Variables:

- GDP capita,
- Migration,
- Labor Productivity,
- Wage,
- Activity rate,
- NEET,
- Life expectancy,
- Fertility rate,
- Population by educational attainment,
- Employment rate,
- Unemployment rate,
- Employment by educational attainment,
- Labor Productivity by NACE activity,
- Business Investment Rate,
- Gross Fixed Capital Formation share (of GDP),
- Output density,
- Employment density,
- Population density.

Controls: Distance from Bruxelles, Macro-region, Capital, Coast, Island, Objective 1 Region, EU Member.

9 activities:

- A Agriculture,
- B-E Industry,
- F Construction,
- G-I Retail, Transport,
- J Information and Communication,
- K Financial and Insurance,
- L-M-N Real Estate and Business Activities,
- O-Q Public Administration, Defence, Education,
- R-U Arts, Entertainment

NACE Rev. 1.1 vs. NACE Rev. 2

NACE Rev. 1.1		NACE Rev. 2	
Section	Description	Section	Description
A	Agriculture, hunting and forestry	A	Agriculture, forestry and fishing
B	Fishing		
C	Mining and quarrying	B	Mining and quarrying
D	Manufacturing	C	Manufacturing
E	Electricity, gas and water supply	D	Electricity, gas, steam and air conditioning supply
		E	Water supply, sewerage, waste management and remediation activities
F	Construction	F	Construction
G	Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods	G	Wholesale and retail trade; repair of motor vehicles and motorcycles
H	Hotels and restaurants	I	Accommodation and food service activities
I	Transport, storage and communications	H	Transportation and storage
		J	Information and communication
J	Financial intermediation	K	Financial and insurance activities
K	Real estate, renting and business activities	L	Real estate activities
		M	Professional, scientific and technical activities
		N	Administrative and support service activities
L	Public administration and defence; compulsory social security	O	Public administration and defence; compulsory social security
M	Education	P	Education
N	Health and social work	Q	Human health and social work activities
O	Other community, social and personal services activities	R	Arts, entertainment and recreation
		S	Other service activities
P	Activities of private households as employers and undifferentiated production activities of private households	T	Activities of households as employers; undifferentiated goods- and services-producing activities of households for own use
Q	Extraterritorial organisations and bodies	U	Activities of extraterritorial organisations and bodies

Population by Educational Attainment

For non-EU countries I used data from the WDI reporting the cumulative percentage of population per ISCED level.

- ISCED_8 = Educational attainment, Doctoral or equivalent, population 25+, total (%) (cumulative) was the lowest share of population;
- ISCED_1 = Educational attainment, at least completed primary, population 25+ years, total (%) (cumulative) being the highest.

```
WDI_data <- WDI %>%  
  mutate(Pop_edu_3 = ISCED_5/100,  
         Pop_edu_2 = (ISCED_3 - ISCED_5)/100,  
         Pop_edu_1 = (ISCED_1 - ISCED_3)/100)
```

Proxy for Kosovo

I could not find data on the level of education of Kosovo's population but I used Labor force by level of education (% of total working-age population with basic, intermediary or advance education) as a proxy.

Focus Balkans - Time series

Focus Balkans - Time series

Focus Balkans - Time series

Employment by Educational Attainment

For Albania and BiH I could not retrieve any data on employment by educational level. On WDI I found:

- Unemployment by level of education (% of total labor force with basic, intermediate or advanced education)
- Labor force by level of education (% of total working-age population with basic, intermediate or advanced education)
- Besides, I already had the Total Labour Force figure.

Employment by Educational Attainment

For Albania and BiH I could not retrieve any data on employment by educational level. On WDI I found:

- Unemployment by level of education (% of total labor force with basic, intermediate or advanced education)
- Labor force by level of education (% of total working-age population with basic, intermediate or advanced education)
- Besides, I already had the Total Labour Force figure.

The process:

- ① Labor Force x Share of Labor force by level of education = Labor Force by education level
- ② Labour Force by education level x Share Unemployment by level of education = Unemployment by education level
- ③ Labour Force by education level - Unemployment by education level = Employment by education level

Visualization - Employment by ISCED
